**DETAIL ACTION**

***Notice to Applicant(s)***

1. This office action is response to the amendment filed on October 20, 2003. As per request, claims 1, 12, 13 and 18 have been amended. Claims 19-29 have been added. Thus, claims 1-29 are pending.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claim 29 is rejected under 35 U.S.C. § 102(e) as being anticipated by McCarthy et al. (6,480,103).

4. McCarthy et al. disclose the invention as claimed which includes a processing device (figure 3, item 110), an image monitor for monitoring images associated with one or more items within the vehicle (see figure 3, item 304), means for communicating a message relating to the one or more monitored items (see at least column 15, lines 9-24), and a controller for controlling at least one function of the vehicle in response to the one or more monitored items (see figure 3, at least items 109, 214, 111, 222, or 216). McCarthy et al. also do disclose that the interactive communicated message is sent to the user via a pager (see figure 3, items 218, 267, 283, and 110, and column 11, lines 43-55).

5. Claims 1-28 are allowable since no of the prior arts disclose a situation controller for a vehicle which includes at least an image monitor for monitoring images associated with one or more items within the vehicle, a processor device coupled to an image monitor for defining situations through item identification data, item position data, and item action data as recited in claims 1, 12 and 18.

### ***Conclusion***

6. Claim 29 is rejected. Claims 1-28 are allowable.

7. Applicant's arguments filed on October 20, 2003 have been fully considered and they are partially deemed to be persuasive. Upon the amended claims, the previous rejections have been withdrawn. However, the newly added claim 29 is still being rejected as set forth above.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3661

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
